Community Project „Reference Implementation PROFIDrive Profile“

Dear Mr. Doe,

How can you take advantage of Web 2.0 for industrial communication technology?

This is precisely the purpose of the industrialNETworX Community Platform. Hilscher is utilizing Web2.0 to explore new ways in technology development. Together with numerous experts from the drive industry and in coordination with the PROFIDrive working group of the PNO the first community project “reference implementation PROFIDrive Profile” started on Jan 27, 2011.

Hilscher offers its base implementation of the profile in source code for use at no cost and manages the further development for the **standard implementation on Hilscher netX technology**. Having regard to the industrialnetworX Public License (INPL) **the software can also be used for other PROFINET / PROFIBUS-technologies**.

With the timely completion of the alpha version until the Hannover Fair 2011, the first milestone has been reached. Next is a scheduled Web-Meeting to explain the current status of the alpha version and to discuss the development steps necessary for a stable beta version until the end of June 2011.

Netviewer Online Meeting on 12 May 2011 at 15:00 standard European time

To participate in the online session with your headset, you can install the Netviewer client either as a program or run it directly online via Flash Player.

- Download installer
<https://get.netviewer.com/meet/join.php?sinr=467246&sipw=nv64>
- Direct execution via Flash Player
<https://www.netviewer.com/de/joinsession/>
- Session number 467246 (no password required)

Participation in the community project is free and new members can join any time.

Registration and other project information are available here:
